Proposed Promenade Design

Consider using gabion or granite to form the retaining structure, creating a three dimensional finish.

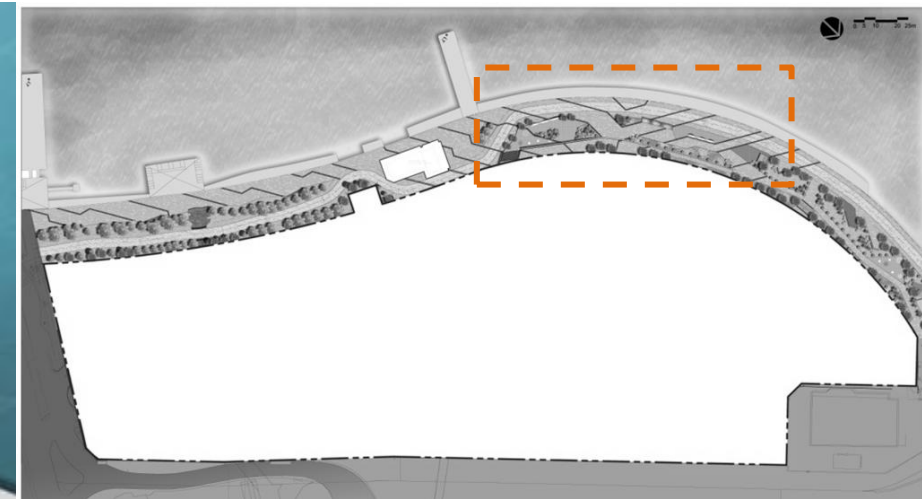

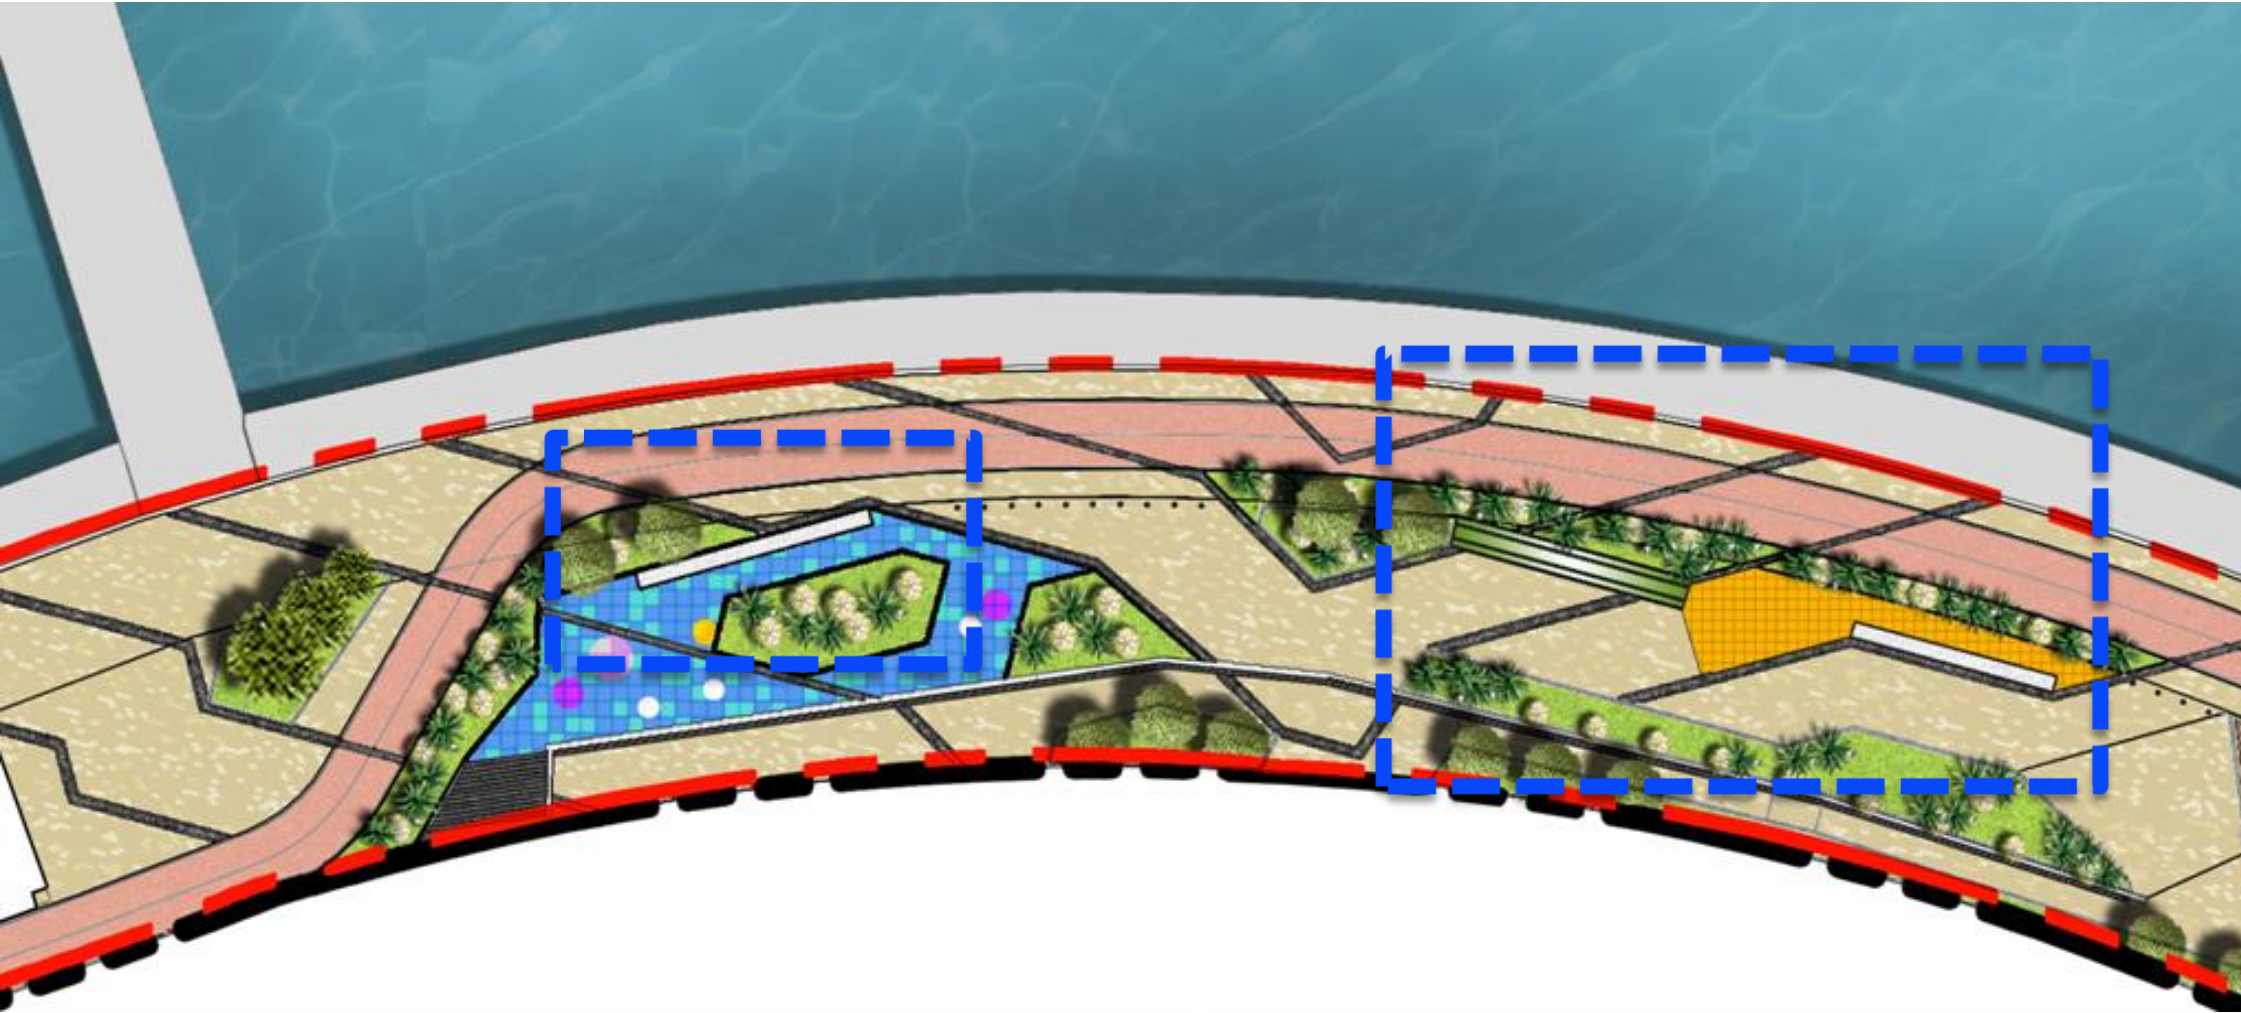

Viewing Platform

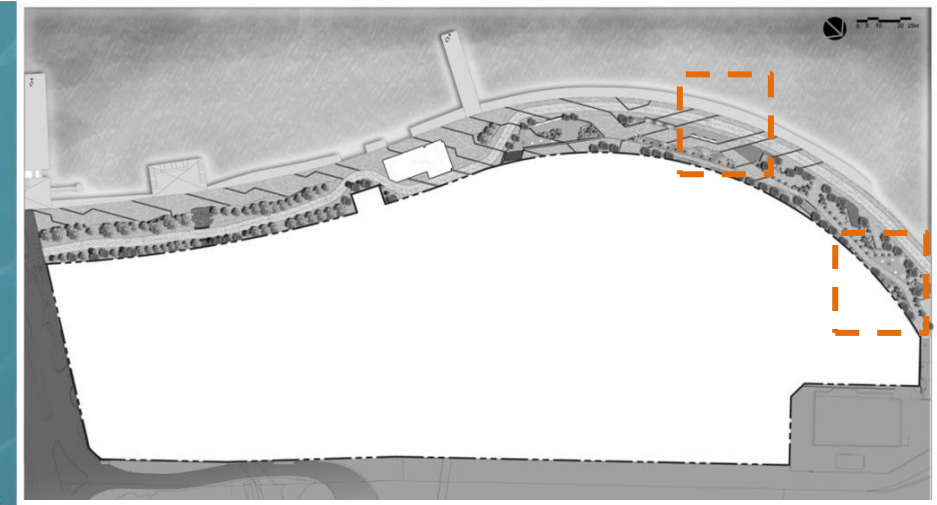

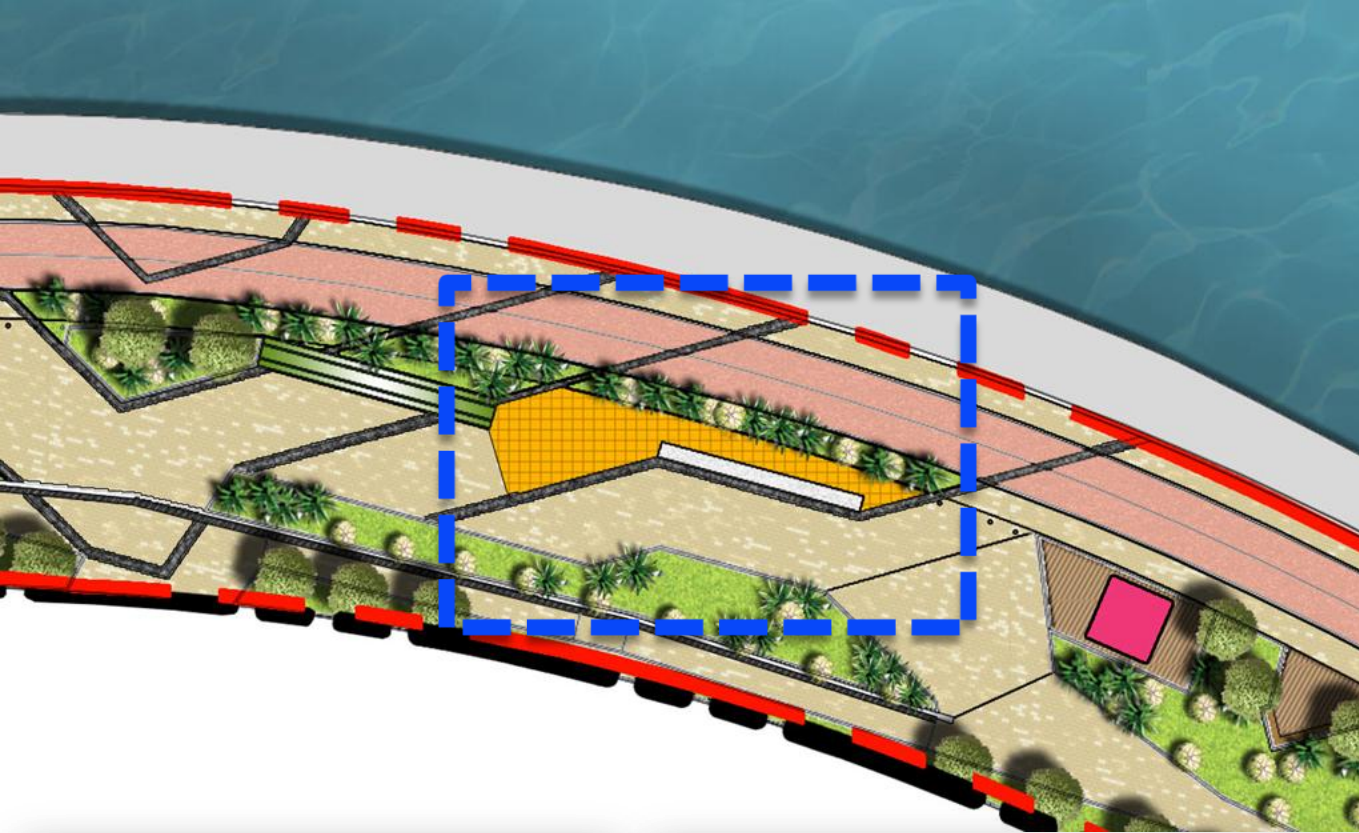

The rubber play mound (EPDM safety mat) provides innovative play equipment, offering children an opportunity for spontaneous play.

Similar to rubber play mound, the undulating lawn and seatwall also provides a sense of design and play.

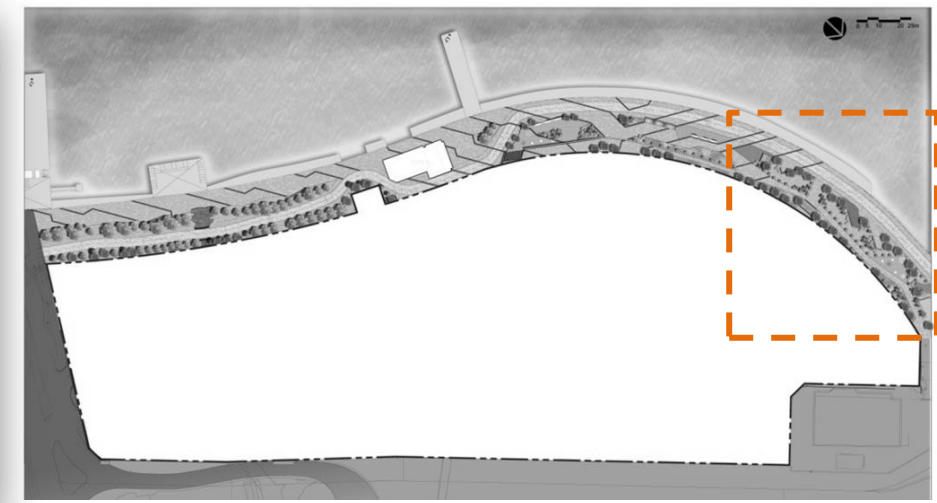

Outdoor fitness equipments for all ages, with simple design and easy to use in mind which is also suitable for the elderly.

- Avoid over complicated components
- Less moving parts to reduce breakage and maintenance
- Simple design means easier to use and versatile
- Equipment chosen to target critical fitness areas
- Material shall be treated to suit coastal condition

Outdoor garden benches shall be robust with sculptural form, using materials such as fiberglass proprietary product, recycled timber or polished granite. The purpose is to provide furniture that is suitable for outdoor condition with lower maintenance frequency in mind, and pleasing to the eye.

Resting Area

紅千層
Callistemon rigidus

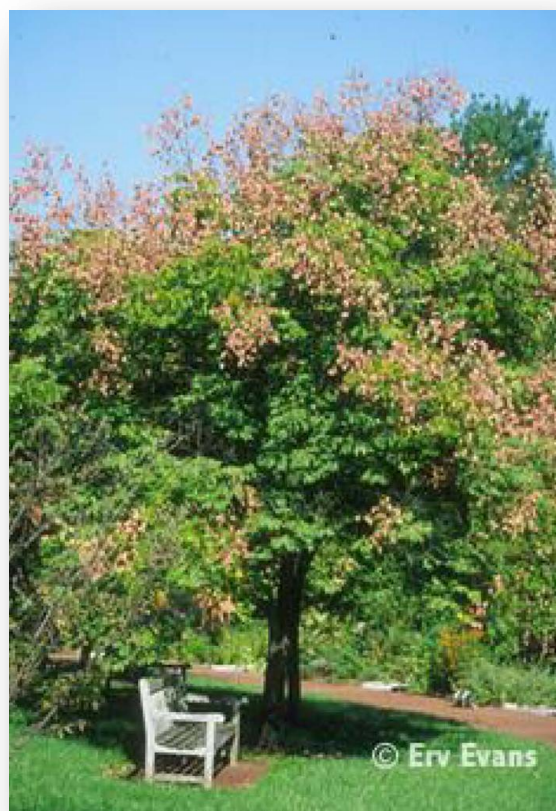

水石榕
Elaeocarpus hainanensis

花葉垂榕
Ficus benjamina L. cv. Variegata

菲島福木
Garcinia subelliptica

欒樹
Koelreuteria paniculata

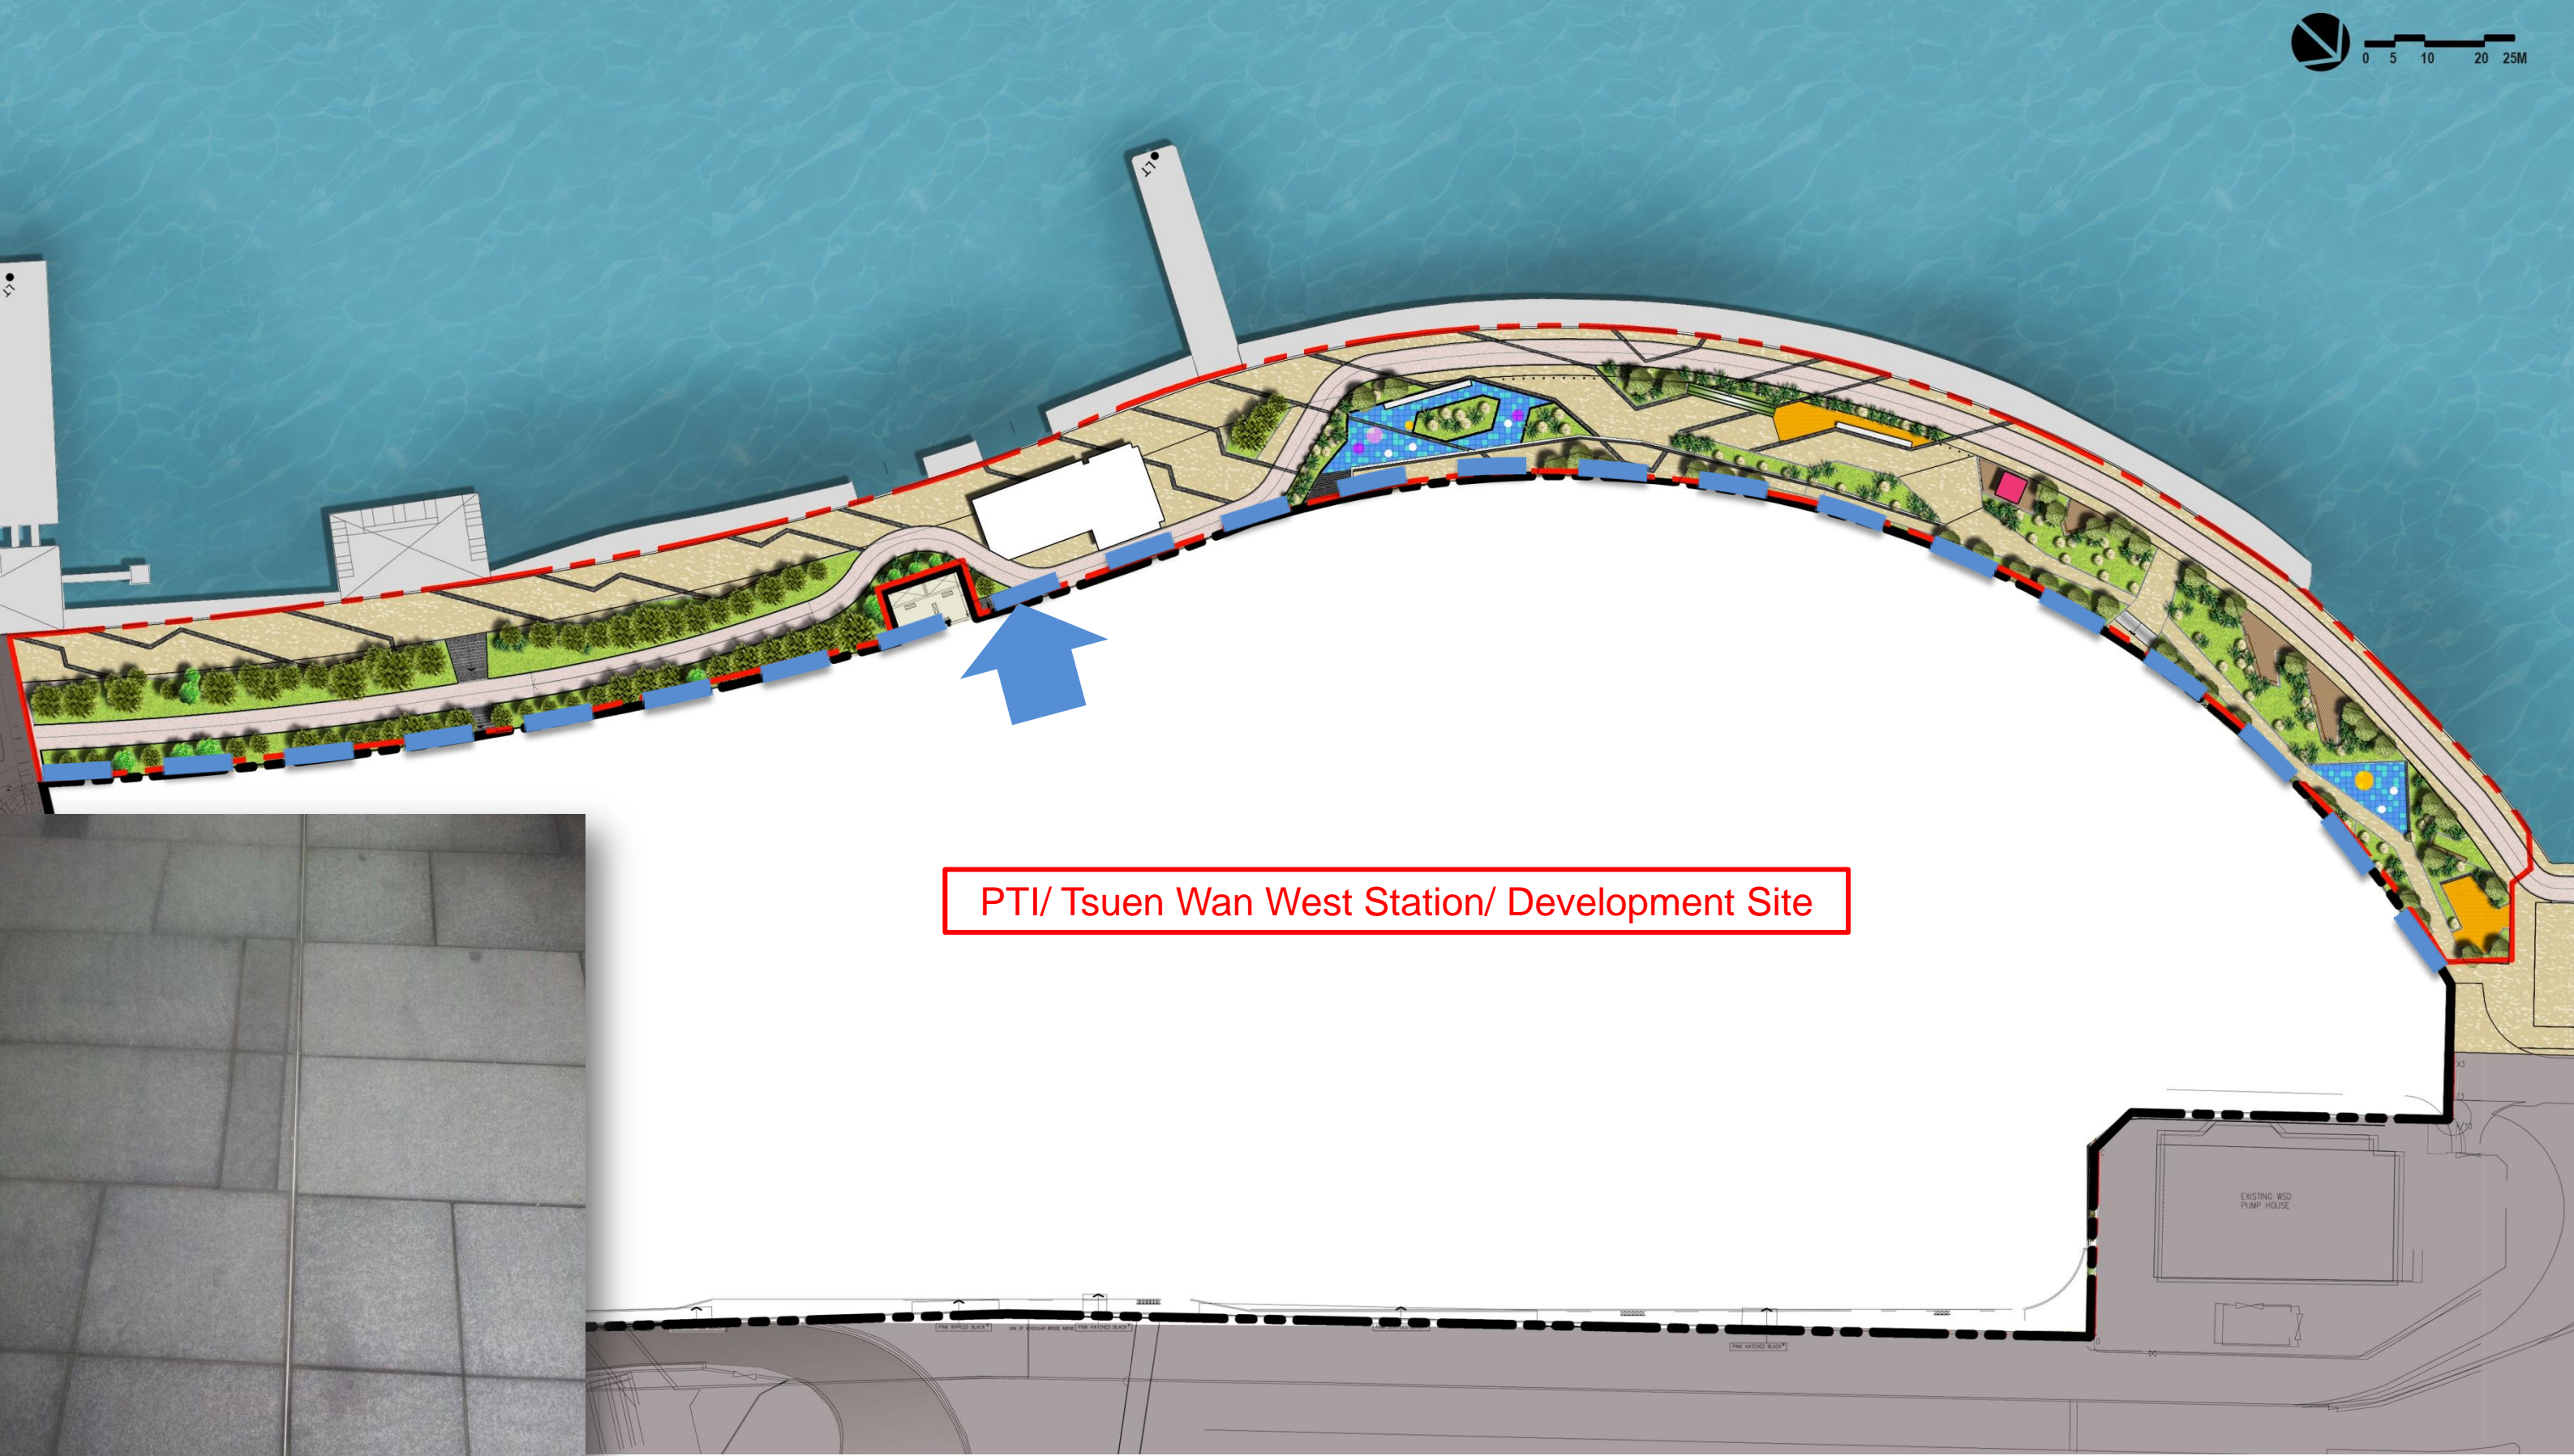

大花紫薇
Lagerstroemia speciosa

蒲桃
Syzgium jambos

墨西哥落羽杉
Taxodium mucronatum

PTI/ Tsuen Wan West Station/ Development Site

Stainless steel strip can be used to separate development site from others. A thin and flush stainless steel strip is discrete enough and yet recognisable, reduce tripping hazard.
