Subject: so impression about hfc

Dear Vincent ,

After reading this

http://www.hfc.org.hk/tc/welcome_message/index.html

[http://www.hfc.org.hk/filemanager/files/HC Annual Report 2010-11_chi.pdf](http://www.hfc.org.hk/filemanager/files/HC_Annual_Report_2010-11_chi.pdf)

I don't understand why the visual support is rather insufficient.

WHY, WHERE, WHAT...

We know there will be three focus groups for the harbourfront, but for the general public , where is the harbourfront we are talking about, there are some difficulties to fig out. Then how can we discuss?

I have dropped a few lines for the harbourfront first stage public engagment.

Does it make sense?

"Will it become another separate authority that drags more resources and opportunities, but nobody can do anything about it?

What is the relationship with the existing Gov Bureau & Departments?

What advantages will it bring?

How can it allow more talent to show their talent and bring contributions to the whole, etc?

What is the balance sheet, tangible and intangible alike.

If deficiency is predictable, what can the authority do and who can stop it?

How can we make all people in office or committee members (public volunteer) having decision power accountable for what they do?

Is there any althernatives ?"

Just reference. Hope you find it thought- provoking. Growing up is the journey for everybody .

Best wishes

Pauline
